## INTRODUCTION: GOODS AND SPENDING IN GENERAL

1--COINS:

| Coin | Copper Penny Value | Silver Penny Value | Gold Mark Value |
| :--- | :--- | :--- | :--- |
| Copper Penny cp | 1 | $1 / 10$ | $1 / 100$ |
| Silver Penny sp | 10 | 1 | $1 / 10$ |
| Gold Mark gp | 100 | 10 | 1 |
| Atlantean Orb ao | 25,000 | 2500 | 250 |

A copper penny, silver penny and gold mark each weighs about 1/100 of a pound (these don't represent historical values, but decimal conversion makes game play far easier). An Atlantean Orb is a perfect round sphere of a strange gold-alloy, usually covered by strange glyphs. These are found throughout the Atlantean ruins of the continent. Each has a weigh of 2.3375 pounds, but has an established market value of 250 gold marks.

2-LIVING EXPENSES. At the start of the session, each player counts-up the total HD/Levels of his PC, henchmen, horses, and any retainers that remained in his service. Then multiply that total by the number of in-game days since his character last adventured. If the player owns sufficient buildings to house all his entourage, divide the total in half. This final total is the number of gold pieces he has spent on food, shelter, entertainment, equipment repair and replacement, training and booze. If he doesn't have enough money to cover the tab, he has just spent all of his money.

3--ENCUMBRANCE: Each item in this book is rated in "Loads" of 5 pounds each. A character can carry one load for each point of Strength he possess. If he goes over the load limit, he loses 5' of movement per Load over his limit, and is at disadvantage to all checks.

4-SHOPPING : The chance of finding particular items and the number available depends on the size of the market and the price of the goods. Check the size of the market below (generally, most shopping will be in Kingston-Class III, or Jorvikburg-Class IV) and cross-reference the cost of the good to determine the number available or the chance of 1 being available.

## EQUIPMENT AVAILABILITY BY MARKET CLASS

| Price | Class I | Class II | Class III | Class IV | Class V | Class VI |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| 1gp | 1700 | 585 | 260 | 65 | 30 | 10 |
| $2-10 \mathrm{gp}$ | 100 | 30 | 15 | 5 | 1 | 1 |
| 11-100gp | 15 | 5 | 2 | 1 | $25 \%$ | $10 \%$ |
| $101-1000 \mathrm{gp}$ | 7 | 2 | 1 | $25 \%$ | $10 \%$ | $5 \%$ |
| $1001-10,000 \mathrm{gp}$ | 2 | 1 | $25 \%$ | $10 \%$ | $5 \%$ | $1 \%$ |
| $10,001+$ | $10 \%$ | $5 \%$ | $2 \%$ | NA | NA | NA |

Examples: Frank wants a Lute (25gp) in a Class III city, he'll find that there are 2 available for sale that month. If he wants riverboat (2000gp) he'll find that there is only a $25 \%$ chance of one being available for sale.

## Market Class Town Population and Examples

Class I: 100,000+: Constantinople
Class II: 25,000-100,000 Rome, Paris
Class III: 8,000-25,000: London, Kingston
Class IV: 3,000-8,000: Jorvikburg, Leifsby, Thorsburg
Class V: 1000-3000: Red Lion
Class VI: less than 1000
SHOPPING PROCEDURE: If players do not wish to spend real time at the table shopping, they can declare "I spend I week of game time shopping (paying their upkeep for themselves and their entourage for that week)" and then they can buy anything that meets the availability on the Market Class Availability chart above.

5-SELLING LOOT: CP, SP, and GP can be freely exchanged at full value. Selling Atlantean Orbs is trickier and requires a CHA check or perhaps a service charge, unless you have developed a steady buyer. Ordinary goods (enemy arms, barrels of wine, furniture etc) can be sold for $1 / 3$ list value in a Class IV or larger market. At a Class V or VI market, goods can be sold at $1 / 4$ of list price, but probably only goods worth 100gp or less will find a buyer.

If the goods are stolen, or seem to be stolen, the player must spend one week locating a "fence", passing a CHA check to do so. The fence will buy stolen goods for $1 / 10$ their list price.
Top of Form
Bottom of Form
Quick and Dirty Selling Method for Unusual Goods, Jewels, and Artifacts: if you have a bunch of stuff you want to sell at without fuss, declare "I want to spend a week selling stuff" and spend the maintenance for that week. The DM adds full value of the gems, jewelry and the like, plus the $1 / 3$ value of the ordinary goods or $1 / 10$ value of stolen goods, for a grand total. Add the LOWER of the character's CHA or INT bonus to 1 d 8 if at Kingston, 1 d 6 if at a smaller town, and multiply the total by 10 , this is the percentage of the total value the player will receive.
